

## Genetics & Physiology of Industrially Important Microorganisms

1	Amarila Malik	Cloning of gene coding for sucrose phosphorylase from <i>Weissella</i> strains isolated from local foods and beverages in Indonesia
2	Rob Brooijmans	Brewing Acids with Yeast
3	Ashraf Attallah	Isolation and Molecular genetic Identification of some <i>Sphingomonas paucimobilis</i> local strains
4	Takashi Inaoka	ScoC regulates the production of an antibiotic bacilysin in <i>Bacillus subtilis</i>
5	Jimmy Tsang	Cloning of a two-component system that affects the expression of a haloacid operon of a <i>Burkholderia</i> species bacterium
6	Renpeng Tian	Mutagenic analysis of the upstream regulatory region of a dehalogenase gene in <i>Burkholderia</i> sp. MBA4
7	Susie Kim	Reducing powers metabolism alteration and specific cofactor requirement change on phosphoglucose isomerase (pgi) mutant <i>Escherichia coli</i> expressing NAD- and NADP-dependent malic enzymes
8	Kazunori Sawada	Metabolic changes in a pyruvate kinase-deleted mutant of <i>Corynebacterium glutamicum</i> ATCC 13032
9	Eunyoung Jeon	Development of recombinant <i>Escherichia coli</i> strains for engineering fatty acid synthesis (FAS)
10	sun hee Lee	Enhancement of Functional Fatty Acid Biosynthesis in <i>Pseudomonas aeruginosa</i>
11	Nick Wierckx	A novel pathway for furfural and hydroxymethylfurfural catabolism in <i>Cupriavidus basilensis</i> HMF14
12	Takeshi Hosaka	The novel mutation V341L in elongation factor G (EF-G) increases antibiotic production in <i>Streptomyces coelicolor</i> A3(2)
13	Meijin Guo	Effect of House-keeping Enzyme G6PDH in Pentose Phosphate Pathway on Oxytetracycline Production in <i>Streptomyces rimosus</i> M4018
14	José María Luengo	Biodegradation of cholesterol, deoxycholate and other steroid compounds by bacteria
15	Germán Naharro	Steroid compounds degradation by <i>Pseudomonas putida</i> DOC21
16	Beatriz Ruiz	Study of the glucose kinases from <i>Streptomyces peucetius</i> var. <i>caesius</i> .
17	Chikako Yamashita	A role of the NCgl1221 mechanosensitive channel in glutamic acid production by <i>Corynebacterium glutamicum</i>
18	Yakir Nataf	The Role of Extracytoplasmic Function (ECF) Sigma Factors in Regulating the Cellulosomal Genes in <i>Clostridium Thermocellum</i>
19	Sung Suk Cho	An amino acid residue in the middle of the fingers subdomain is involved in Neq DNA polymerase processivity
20	Sergio Sanchez	Synthesis and regulation of SCO2127 from <i>Streptomyces coelicolor</i>
21	Mamoru Komatsu	Characterization of <i>relA</i> mutant of industrial microorganism <i>Streptomyces avermitilis</i>
22	Suriana Sabri	Deletion analysis of sucrose metabolic genes in <i>E. coli</i>
23	Naoko Kito	Mutation analysis and domain switching of epsilon-poly-L-lysine synthetase using a newly developed expression system
24	Supatra Areekit	Cloning, expression, and characterization of thermotolerant manganese superoxide dismutase from <i>Bacillus cereus</i> isolate 47
25	Ann Lok Yan So	Sequencing and analysis of two cryptic plasmids from <i>Zymomonas mobilis</i> strain NCIMB 11163
26	Nelson Lima	Improving a brewer's yeast strain for higher productivity of brewing fermentations
27	Kenji Manabe	Effect of <i>rocG</i> expression on recombinant enzyme productivity in a <i>Bacillus subtilis</i> strain with a reduced genome
28	Yasushi Kageyama	Enhanced recombinant protein productivity by genome reduction in <i>Bacillus subtilis</i>
29	Jae Hyung Jo	Expression of human lactoferricin in <i>Escherichia coli</i> using fusion partner
30	Andrei Miasnikov	Engineering glycosylation of industrial enzyme to improve functionality and yield
31	Young Kim	Positive effect of a TetR-family transcriptional regulator MdoR in the oxidation of methylamine in <i>Mycobacterium</i> sp. strain JC1 DSM 3803
32	Mi-hak Park	<i>Bacillus doosanensis</i> sp. nov., a moderately halophilic bacterium isolated from a shrimp aquafarm of the Sukmo Island in Republic of Korea
33	Jitsopin Traiwan	<i>Paenibacillus puldeungensis</i> sp. nov., isolated from a grassy sandbank from the DaeYiJac Island in Republic of Korea

34	Chul Ho Kim	Biological production of 1,3-propanediol from glycerol
35	Wolfgang Liebl	Characterization of <i>Bacillus licheniformis</i> mutants generated via trans-conjugation DNA transfer
36	Yncheng Wen	Quorum sensing controls the siderophore production by regulating <i>vvsA</i> ( <i>Vibrio vulnificus</i> siderophore synthase) expression in <i>Vibrio vulnificus</i>
37	Areum Jo	Identification of aptamers and a protein physically bound by cyclo-Phe-Pro (cFP) in <i>V. vulnificus</i>
38	Thean Chor Leow	Effect of Signal Peptide on The Expression and Purification of T1 Lipase
39	Bertrand Aigle	Identification of genes potentially involved in NHEJ-like system in <i>Streptomyces ambofaciens</i>
40	Vicky Wong	Endophytic Fungi of Singapore
41	Doo Hyun Nam	Biochemical Properties of Acyl-CoA Carboxylase Complex for the Secondary Metabolism in <i>Streptomyces toxytricini</i>
42	Young Nam Lee	Isolation and characterization of exopolysaccharide of MK1
43	TaeWoo Lee	Gene inactivation of acid formation in <i>Clostridium acetobutylicum</i> and identification of their metabolic characteristics
44	Sol Choi	Transcriptome Analysis of Adaptive Succinic Acid Tolerance Response in <i>Mannheimia succiniciproducens</i>
45	Mohsen Najimi	Iron uptake systems in <i>Aeromonas salmonicida</i>
46	Soon-Yong Choi	Antimicrobial and anti-inflammatory effects of newly synthetic Cecropin A (1-8)-Magainin 2 (1-12) hybrid peptide analogue P5 against <i>Malassezia furfur</i> infection in human keratinocytes
47	TaeWoo Lee	One-Step Production of Polylactic Acid and Its Copolymers by Metabolically Engineered <i>Escherichia coli</i>
48	Sang Yup Lee	A Systematic Proteome-Based Approach for High-Level Extracellular Production of Recombinant Proteins in <i>Escherichia coli</i>
49	Sol Choi	High Level L-valine Production by Metabolically Engineered <i>Escherichia coli</i> Based on in silico Flux Response Analysis
50	Jungoh Ahn	Simultaneous production of recombinant protein and ethanol in <i>Saccharomyces cerevisiae</i> at anaerobic conditions using GAL10 promoter
51	Jungoh Ahn	Identification of novel potential antigens in pathogenic <i>Haemophilus parasuis</i> based on genome sequence analysis
52	Ji Eun An	Screening and Identification of Antibacterial Lactic Acid Bacteria Isolated from Kimchi
53	Ji Eun Kim	Acid tolerance response (ATR) was not induced in <i>Leuconostoc mesenteroides</i> ATCC 8293 by pre-adaptation in mild acid condition
54	Gi-Seong Moon	Effective inhibition of <i>Listeria monocytogenes</i> by a recombinant <i>Lactobacillus reuteri</i> producing pediocin PA-1
55	Seung-Hwan Park	Six different fusaricidins produced by the nonribosomal peptide synthetase <i>FusA</i> of <i>Paenibacillus polymyxa</i> E681 and their possible role as elicitors of induced systemic resistance on pepper
56	Suwan Son	Microarray Analysis of Knockout Mutant <i>LuxS</i> relevant to the Quorum Sensing Mechanism in <i>Escherichia coli</i> K-12
57	Maria Holmbäck	Biocatalysis in process development
58	Sang Yup Lee	Butanol production from novel synthetic pathway in <i>Escherichia coli</i>
59	Wenqing Chen	Polyoxin Biosynthesis in <i>Streptomyces</i> Featuring an Unprecedented
60	Sang Yup Lee	Metabolic Engineering of <i>Escherichia coli</i> for the Production of 1,4-Diaminobutane
61	Merced Gutierrez	Metabolic relationship between PHA and rhamnolipid synthesis in <i>Pseudomonas aeruginosa</i>
62	Mun Hwan Choi	Enhanced Production of Longer Side-Chain Polyhydroxyalkanoic Acid with $\omega$ -Aromatic Group Substitution in <i>phaZ</i> -Disrupted <i>Pseudomonas fluorescens</i> BM07 Mutant through Unrelated Carbon-Source Cometabolism and Salicylic Acid $\beta$ -Oxidation Inhibition
63	Baoxia Tian	Isolation of transposon mutants and characterization of genes involved in the production of polyhydroxyalkanoic acid and cold-induced exobiopolymer by <i>Pseudomonas fluorescens</i> BM07
64	Jingdan Liang	Sequence selectivity of bacterial DNA phosphorothioate modification and its functioning in the inhibition to specific restriction enzymes

65	Jung Hoe Kim	Enhancement of Xylitol Production Rate and Yield Using Glucose as Co-substrate in Metabolically Engineered <i>Candida tropicalis</i>
66	Nisa Mubarik	Purification and Characterization of Extracellular Protease Indigenous Thermophilic <i>Bacillus</i> sp. strain GP-04
67	Sintawee Khuchareontaworn	Novel long-term storage cholesterol esterase isolated from thermotolerant <i>Pseudomonas aeruginosa</i> isolate RE24.3
68	Yusuke Kagawa	Analysis of methanol-inducible promoter identified in the actinomycete <i>Rhodococcus erythropolis</i>
69	Ji-Nu Kim	Improvement of doxorubicin production in <i>Streptomyces peucetius</i> ATCC 27952 using proteomic approach
70	Sung Ok Han	Cellulosic Ethanol Fermentation Using Recombinant <i>Saccharomyces cerevisiae</i> Engineered for Assembly of Minicellulosomes on the <i>Saccharomyces cerevisiae</i> Cell Surface by Type I and Type II cohesin-dockerin interaction
71	Sung Ok Han	Synthesis of FAEEs and ethanol using glycerol in <i>Saccharomyces cerevisiae</i> by heterologous expression of WS/DGAT
72	Sol Choi	Genome-based Metabolic engineering of malate and fumarate production in <i>Mannheimia succiniciproducens</i>
73	TaeWoo Lee	The phosphotransferase system for sucrose utilization in <i>Mannheimia succiniciproducens</i>
74	Xinqing Zhao	Gene-based mining of marine streptomycetes for novel compound discovery
75	Kee Pum Kim	Characterization and PCR application of the thermostable DNA polymerase from <i>Thermococcus pacificus</i>

### Microbial Genome Structure & Evolution

76	I Putu Sudiarta	Bifunctional Hydrolytic Activities of YjbJ Domain of <i>Bacillus subtilis</i>
77	Anna Klicka	Natural plasmids of three astaxanthin-producing bacterial strains – genomic analysis and construction of shuttle vectors
78	Brenda Sanchez	Carbon source regulation of morphological differentiation in <i>Streptomyces coelicolor</i>
79	Cuauhtemoc Licona Cassani	On the reconstruction of the <i>Saccharopolyspora erythraea</i> Genome Scale Model
80	Kian Sim Goo	Biotransformation of a <i>Streptomyces clavuligerus</i> hydroxylase (DACS) to a bi-functional enzyme with ring-expansion activity
81	Hiroki Takahashi	Construction of an analytical platform of metabolomics by LTQ-Orbitrap: toward elucidation of cellular metabolome in <i>Bacillus subtilis</i>
82	Dae-Kyung Kang	Proteomic analysis of <i>Lactobacillus johnsonii</i> PF01 exposed to bile stress
83	Hyung Kwoun Kim	Asymmetric production of ethyl (S)-4-chloro-3-hydroxybutanoate by recombinant <i>Escherichia coli</i> co-expressing <i>Saccharomyces cerevisiae</i> reductase and <i>Bacillus subtilis</i> glucose dehydrogenase
84	Hyung Kwoun Kim	Structure modeling of <i>Saccharomyces cerevisiae</i> reductase specific for the synthesis of (S)-3-chloro-1-phenyl-1-propanol
85	Gyooseung Jung	Full genome analysis of <i>Varicella Zoster virus</i> vaccine strain MAV/06
86	Ju Yeon Song	Genomic framework of the Secondary Metabolism in <i>Streptomyces clavuligerus</i> ATCC 27064
87	Wonyong Kim	rpoA is a useful gene for identification and classification of <i>Streptococcus pneumoniae</i> from the closely related viridans group streptococci
88	Hee kuk Park	Comparative metagenomic analysis of the human scalp environment in health and disease
89	Chul Hyung Kang	A Novel FamilyVII Esterase with Industrial Potential From Compost Metagenomic Library: The activity toward the polyurethane and esters of tertiary alcohol

### Microbial Processes for Food & Beverage Industry

90	Deok-Kun Oh	Hydrolytic properties of a thermostable $\alpha$ -L-arabinofuranosidase from <i>Caldicellulosiruptor saccharolyticus</i>
91	Deok-Kun Oh	L-Ribose production from L-arabinose Using L-arabinose isomerase and mannose-6-phosphate isomerase from <i>Geobacillus thermodenitrificans</i>
92	Deok-Kun Oh	A positively charged amino acid at position 129 in nitrilase from <i>Rhodococcus rhodochrous</i> ATCC 33278 is an essential residue for the activity with meta-substituted benzonitriles
93	Deok-Kun Oh	Retinal production from $\beta$ -carotene by $\beta$ -carotene 15,15'-dioxygenase from uncultured marine bacterium
94	Satoshi Mitsuhashi	Surfactin as a secretion factor of vitamin K2 in <i>Bacillus subtilis</i>
95	Young-Jae Jeon	Xylitol production from a mutant strain of <i>Candida tropicalis</i> SS2

96	Olga Mameeva	Dependence of the <i>S. cerevisiae</i> fatty acid content from ethanol and 2-phenylethanol stresses under different conditions
97	SungJun Hong	Cloning, expression, purification and characterization of a thermostable Glutamate decarboxylase GAD from <i>Thermococcus kodakarensis</i> KOD1
98	Kyung Hun Jung	Characterization of a thermostable recombinant $\beta$ -Galactosidase from <i>Methanothermobacter thermoautotrophicus</i>
99	JinHo Shin	Stable antifungal substance from <i>Burkholderia</i> sp. JH1023 Against <i>Botrytis cinerea</i> from strawberry
100	Min Jeong Kim	Cloning and characterization of the pullulanase type glycogen debranching enzyme from <i>Arthrobacter chlorophenolicus</i> KCTC 9906
101	Hyun kug Cho	Biosynthesis of catechin glycosides using recombinant amylosucrase from <i>Deinococcus geothermalis</i> DSM 11300
102	Seung-Goo Lee	Finding Modularity and Simultaneous Improvement of Catalytic Activity and Thermal Stability of Tyrosine Phenol-Lyase by DNA Shuffling
103	Sukree Photisarach	Optimization of <i>Acetobacter xylinum</i> for Bacterial Cellulose Production Cultured in Tofu Whey
104	James Strong	A multi-phasic comparison of metabolite profiles in a yeast strain and a biopolymer-producing bacterium
105	Hyun Chang Choi	Optimization of hyaluronic acid production by <i>Streptococcus</i> sp. KL0188 with non-animal derived nitrogen source
106	Mi-Hwa Lee	Cold-active Lipolytic Enzymes from a Tidal flat-derived Metagenomic library
107	Seiki Takeno	Engineering of <i>Corynebacterium glutamicum</i> with a NADPH-generating glycolytic pathway for L-lysine production

### New & Alternative Therapies

108	YoungDuck Lee	Genomic Sequence Analysis of Virulent Phage SA1 Infected in <i>S. aureus</i>
109	YoungDuck Lee	Characterization of Virulent Phage SA1 of <i>S. aureus</i> for Bacteriophage Biocontrol of <i>S. aureus</i>

### Omics of Environmental Technologies

110	Alper Yaser	Microbial Source Tracking of Faecal Pollution in the Sydney Water Catchment
111	Xinyi Xu	Cloning and characterization of a DNA-binding protein from a <i>Burkholderia</i> species bacterium
112	Woojun Park	Physiological and metabolic responses for alkane degradation in <i>Acinetobacter</i> sp. strain DR1
113	Sukanya Sridee	Production of Degradable Pots from Bacterial Cellulose
114	Sindor Pardayev	Influence of organic compost on microbiological activity serozem soils Uzbekistan

### Search and Biodiscovery of Industrially Important Compounds

115	Simone Herrmann	Site-specific recombinases applicable in Actinomycetes NOW!
116	worapol Aengwanich	Effect of Yambean ( <i>Pachyrhizus erosus</i> L. Urbar) Powder Supplementation in Diets on Productive Performances and <i>Lactobacillus</i> spp. Population in Broilers
117	Rachel Gurney	Substrate specificity of the trans-acting acyltransferases of the Mupirocin biosynthetic cluster
118	In Cheol Yeo	Characterization of antagonistic substance against foodborne pathogens produced by <i>Bacillus subtilis</i> SC-8
119	Ayako Takada	Inhibition of flagellation by the bacterial actin MreB inhibitor A22
120	Chie Kosaka	Simultaneous defects of MreB and PBP 1B cause cell lysis in <i>Escherichia coli</i>
121	Akina Horikawa	A role of the outer-membrane TolC protein in acid tolerance of <i>Escherichia coli</i>
122	Deok-Kun Oh	Effect of carbon source on the production of lycopene by metabolically engineered <i>Escherichia coli</i>
123	Kian Sim Goo	Evaluation of bioconverted cephalosporins produced by a bioengineered streptomycete deacetoxycephalosporin C synthase
124	Jozef Anné	Bacterial protein secretion as a target for novel antibiotics: discovery of small-molecule SecA inhibitors
125	Dirk Schwartz	Regulation of friulimicin production in <i>Actinoplanes friuliensis</i>
126	Anna Ramata-Stunda	Influence of AMP deaminase, an immunomodulatory protein from <i>Penicillium</i> , on human dermal and epidermal cells

127	Pyoung-il Kim	Characterization and Structure Identification of a Novel Antimicrobial Peptide, Hominicin, Produced by <i>Staphylococcus hominis</i> MBBL 2-9
128	Chia-Yin Lee	Biochemical characterization and kinetic analysis of N-acyl-homoserine lactone acylase with quorum-quenching activity
129	Jae Woo Han	Active site modification of adenylation domain of the fusaricidin nonribosomal peptide synthetase for selective production of fusaricidin derivatives
130	Myung Hee Kim	Preliminary Crystallographic Characterization of the Transcriptional Regulator Narp from <i>Salmonella</i> Enterica Serovar Typhi
131	Seung-Hwan Park	Identification of Polymyxin Synthetase Gene Clusters of <i>Paenibacillus polymyxa</i> strains and Expression of the Gene in the Surrogate Host <i>Bacillus subtilis</i>
